Fair Usage Policy

November 2022

RISK WARNING: Trading leveraged derivative products such as Foreign Exchange (Forex), Contracts for Difference (CFDs) or other financial derivative products carries a high level of risk to your capital. All these products, which are leveraged derivative products, may not be appropriate for all investors. The effect of leverage is that both gains and losses are magnified.

The vast majority of retail investor accounts lose money when trading CFDs with INFINOX. The prices of leveraged derivative products may change to your disadvantage very quickly, it is possible for you to lose more than your invested capital and you may be required to make further payments. Before deciding to invest in any financial product, you should carefully consider your investment objectives, trading knowledge and experience and affordability. You should only trade in Forex and CFDs if you have sufficient knowledge and experience of the risky nature of the products, the risks involved in trading such products and if you are dealing with money that you can afford to lose.

You should seek independent professional financial advice if you are in any doubt.
